General information

Introduction

Each year, more than 5000 students graduate from Cphbusiness and enter the working life in Denmark, and more than 8000 students who have already begun their careers receive continuing education here.

Our degree programmes are grounded in real life, so our students begin to engage with actual problems and case studies taken straight from actual businesses on day one. Alongside mandatory internships for all degree programmes and a focus on translating theory into practice, this equips our students with the skills they need to contribute to a business from their first day of work.

What is Cphbusiness?

Cphbusiness is Denmark's largest business academy, with campuses in Copenhagen, Lyngby, and Hillerød, as well as a presence in Bornholm.

The full-time programmes at Cphbusiness include both AP (academy profession) and top-up bachelor's degree programmes that emphasise professionalism and applicability. These degree programmes last between 1.5 and 3.5 years each and cover a wide variety of subjects.

Cphbusiness also offers continuing education to individuals in the form of full academy and certificate programmes as well as short courses, and it participates in tailor-made, long-term educational programmes with small and large businesses alike.

Close collaboration with businesses

Above all else, Cphbusiness strives to give its students the best possible start to their careers while also equipping Danish business employees with applicable skills and capabilities. Therefore, Cphbusiness closely collaborates with the business sector, involving companies throughout the entire study process. Students engage with case studies, collaborate with businesses, and experience presentations from external speakers during their studies. The form and content of each programme is continuously adapted to the needs of businesses using feedback from industry representatives, and internships also play a major role.

Internships for all programmes

Every full-time programme at Cphbusiness requires students to complete an internship lasting at least 12 weeks, resulting in more than 2400 internships each year. Internships provide a unique opportunity for students to apply their new skills to solve real, specific problems at Danish and international businesses while gaining work experience.

The internship is a fundamental aspect of the programmes, ensuring that graduates from Cphbusiness can contribute from day one. Additionally, it guarantees that the programmes consistently receive input from the business sector through the interns and the ongoing communication the internship supervisors at Cphbusiness have with the internship companies.

At the end of their internships, interns write a report about their experiences, and the businesses that hosted them often play a major role in the final projects that conclude our students' programmes.

Curiosity and personal leadership

When they start their internships, students from Cphbusiness bring more to the table than just expert knowledge of their fields. They also come with a personal tool kit.

Throughout Cphbusiness, our students are consciously engaged in character development and personal leadership for the full duration of their studies. They develop qualities like curiosity, courage, and integrity, bolstering their ability to contribute actively to a business and take responsibility for the results they achieve alone and with others.

The internship plays a key role in the development of a student's professional identity, and the business hosting a student also contributes significantly to the student's education, such that they not only gain expertise, but also the ability to apply it in practice.

Why interns?

There are many advantages to hosting students from Cphbusiness as interns:

- You gain new input from an intern who is fully up to date on the latest theories, tools, and methods
- You gain a unique recruitment channel, with the time to evaluate a potential future employee over a longer period of time
- You gain a curious, motivated employee who approaches their work with enthusiasm and an open mind
- You educate and develop the next generation of your industry's employees and take responsibility for the ecosystem you are part of

What is expected of the business?

The business and the student work together to develop a programme that provides the student the opportunity to work on a particular issue or situation. The student must be able to collect enough data and knowledge in the process to prepare a written report, which is required at the end of the internship.

We expect students to work on professionally relevant tasks, and businesses must set aside sufficient resources to guide the student. Over the course of the internship, there should naturally also be some time for the student to become acquainted with the characteristics and workflows of the business. The resource consumption associated with an internship is difficult to determine precisely, but it is typically greatest at the beginning of the process, when the student has only limited insight into the field the business operates in.

Businesses that host internships must have sufficient resources available to offer their interns. In our experience, a one-person business bringing in an intern to become the owner's means of production is not an optimal internship arrangement. Additionally, it is not desirable for businesses to rely on a steady supply of interns each semester in order to function. Cphbusiness expects students to be assigned fixed contacts who they can turn to for feedback and input during their work and when working on their final projects.

What can you expect as a business?

- Solutions to specific issues your business is facing
- Motivated, active participation in daily tasks
- A curious, directed approach to personal development and learning about your business
- The application of new ideas, based on the latest theories in the student's fields of study
- A unique recruitment opportunity, as well as the opportunity to develop and educate a new generation in your field

General information about internships

A majority of our students start their internships in either January/February or August/September. They work for a total of 35–37 hours per week. The length of an internship can vary from 12 weeks to one year, depending on the student's course of study.

Interns in most programmes are unpaid, since the students in these programmes are entitled to SU (state educational grants) during their internships. Interns from the Commerce Management and Chemical and Biotechnical Science AP degree study programmes do receive pay during their internships, which last 8–12 months.

The business and intern will both assess the internship as a whole with a view towards strengthening their collaboration in the future.

Insurance

Internships in Denmark

According to the Executive Order on Workers' Compensation for Students, a business that hosts interns is obligated to insure students during their internships, provided that the internships take place in Denmark.

How do you get an intern?

We gladly accept internship proposals that describe your business and the nature of your work. You can also contact the appropriate internship co-ordinator for more information and a general discussion of internships. We look forward to working with you!

More information is available at
cphbusiness.dk/find-jeres-praktikant

About our programmes

AP degree study programmes

AP degree study programmes build on the upper secondary and vocational programmes offered in Denmark.

These programmes last 2-2½ years and combine practice and theory. This is why these programmes include an internship.

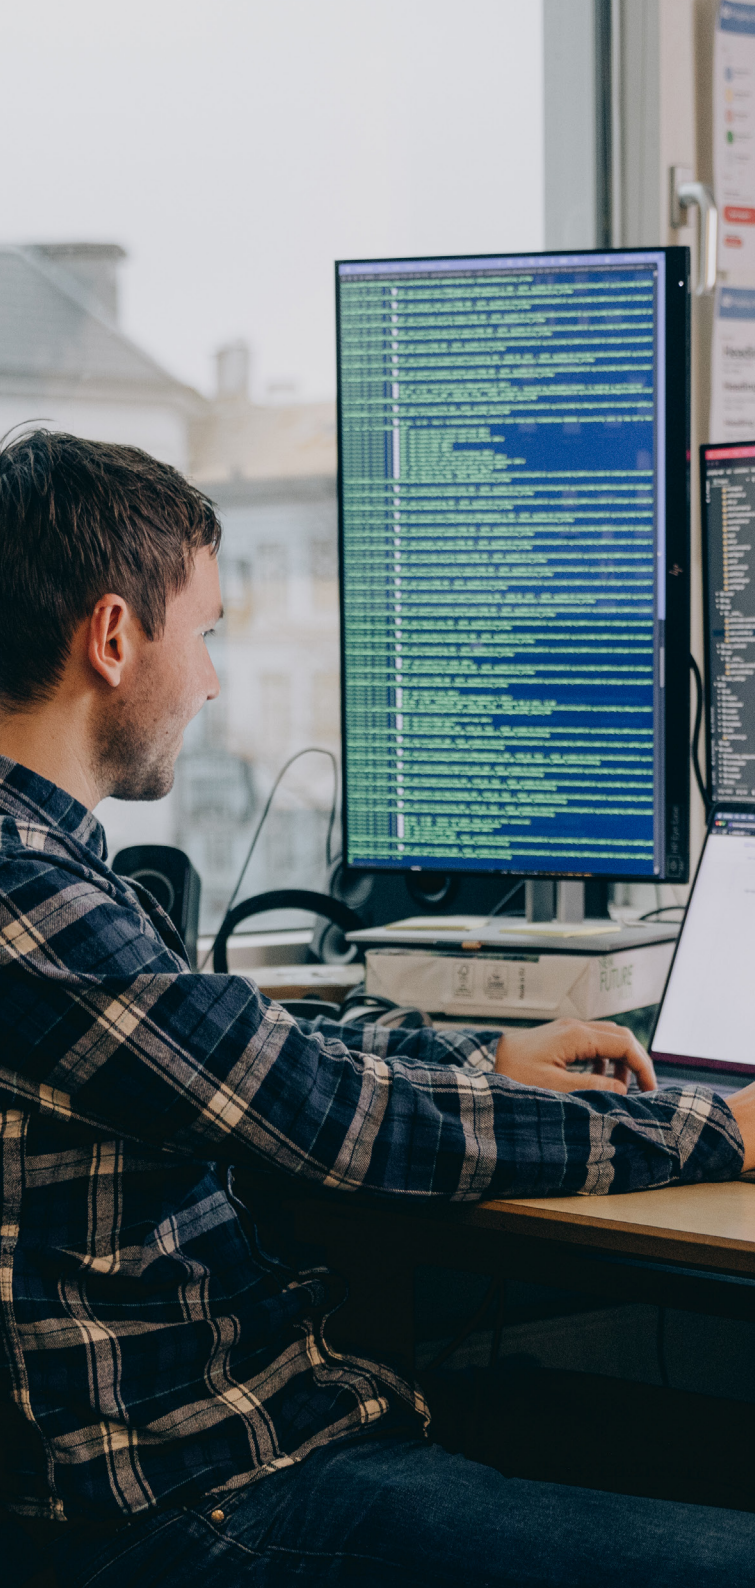

The programmes incorporate content worth 120 ECTS credits. Completing an AP degree study programme grants access to top-up bachelor's degree programmes, which last 1½ years.

Top-up bachelor's degree programmes

Top-up bachelor's degree programmes are bachelor-level programmes that target specific professions.

Ordinarily, a top-up bachelor's degree programme lasts 3½ years. With the exception of the Financial Management and Service programme, the top-up bachelor's degree programmes at Cphbusiness are standalone supplements to AP degree study programmes, so these programmes take 1½ years to complete.

AP degree study programmes
at Cphbusiness

Computer Science

The Computer Science programme prepares students for programming, system development, project management, or technical problem resolution.

Students gain the skills they need to analyse, plan, and execute solutions related to developing and integrating IT systems in private and public organisations, domestically and internationally.

During this programme, students learn about and practise:

- Programming
- System development
- Networking, technology and servers
- Business theory

What is this degree for?

This degree is for those wishing to work as programmers, system developers, IT consultants, and project managers. It offers many opportunities, and a lack of talent in the IT sector is anticipated in the future.

Programme facts

Duration of programme: 2½ years

Level of education: AP degree study programme

Internship period: 5th semester

(January - April /

August - November)

Salary:

SU (state educational grant)

Financial Controller

The Financial Controller programme gives students broad knowledge of business economics, financial management, auditing, controlling, external accounting, and law (including tax and VAT law). It provides them with the tools they need to understand and analyse financial issues.

This degree may be the first step towards a career in auditing, financial positions at private businesses, various controlling functions, payroll, accounting, or budgeting at public and private organisations.

During this programme, students learn about and practise:

- Business and social economics
- Business law
- Expanded and external accounting
- Controlling, payroll and auditing

What is this degree for?

This degree qualifies students to become apprentice auditors and to handle budgeting, accounting, and a variety of controlling tasks across many industries. Typically, a fully trained financial controller will serve as a controller, financial consultant, payroll associate, accounting assistant, financial assistant, auditing assistant, or project associate.

Programme facts

Duration of programme:	2 years
Level of education:	AP degree study programme
Internship period:	4th semester (January – April)
Salary:	SU (state educational grant)
Programme language:	Danish

Read more about this programme at
cphbusiness.dk/financial-controller

Financial Management

The Financial Management programme offers students broad knowledge of financing, insurance, real estate, and property management. Advising banks and customers are key elements of this programme.

This degree may be the first step towards a career in the financial sector. It provides a thorough introduction to financial business functions and products, as well as the tools needed to understand and analyse issues related to financial theory. Students arrive at their three-month internships well equipped.

During this programme, students learn about and practise:

- Financial businesses and markets, and personal and corporate finance
- Social economics, statistics, and business law
- Marketing, customer and partner relations, and communication

What is this degree for?

This degree provides students with a solid foundation for work in the financial sector, such as at financial institutions, real estate brokerages, property management companies, insurers, and finance departments in private and public organisations.

Programme facts

Duration of programme:	2 years
Level of education:	AP degree study programme
Internship period:	4th semester (January - April / August - November)
Salary:	SU (state educational grant)
Programme language:	Danish

Commerce Management

The Commerce Management programme is for students looking to work in fields like sales management, customer relations, procurement, and operations. This programme offers students broad knowledge of topics like marketing, communication, organisation, and management, as well as the tools needed to analyse and understand issues from a commerce management perspective.

Commerce Management students can choose to specialise in sales and sales management (business-to-business), procurement and procurement management, or retail and retail management.

During this programme, students learn about and practise:

- Management and collaboration
- Economics and commercial law
- Logistics and procurement
- International communication
- Marketing and international trade
- Procurement and sales, both B2B and B2C

What is this degree for?

This degree qualifies students to handle tasks involving procurement, sales, and marketing at commercial businesses. Example job titles include CRM manager, key account manager, account manager, sales consultant, purchaser, and purchasing assistant.

Programme facts

Duration of programme: 2 years
Level of education: AP degree study programme
Internship period: 3rd - 4th semester
(by agreement)
Salary: Paid internship
Programme language: Danish

Read more about this programme at cphbusiness.dk/handelsøkonom

Chemical and Biotechnical Science

The Chemical and Biotechnical Science programme offers students broad knowledge related to pharmaceutical inspection and analysis across various sectors.

Students pursuing the Chemical and Biotechnical Science programme learn about basic laboratory equipment, analysis equipment, microbiology, genetic technology, protein purification, and pharmaceutical manufacturing.

The programme incorporates classroom instruction, laboratory exercises, presentations, field trips to businesses, work, and teaching in our laboratories. The internship length is fixed at 1 year.

During this programme, students learn about and practise:

Instruction focused on the following areas

- Biochemistry
- Laboratory equipment
- Quality assurance
- Microbiology
- Biotechnology

What is this degree for?

The Chemical and Biotechnical Science degree prepares students for jobs in areas that are growing and developing rapidly. Students typically find jobs in such areas as research, pharmaceutical and food manufacturing, and environmental management.

Programme facts

Duration of programme: 2½ years

Level of education: AP degree study programme

Internship period: 4th - 5th semester
(1 year)

Salary: Paid internship

Programme language: Danish

Read more about this programme at
cphbusiness.dk/laborant

Logistic Management

The Logistic Management programme prepares students to work in procurement, logistics, inventory management, production planning, supply chain management, and transportation planning in an international environment.

During this programme, students learn about and practise:

- Logistics, procurement, distribution, and manufacturing
- Supply chain management
- Organisation and management
- Communication and negotiations in English
- Economics and statistics
- Law

What is this degree for?

The work of a Logistic Management degree holder typically involves some of the following:

- Distribution and transportation logistics
- Competitor and human resource analysis
- Procurement
- Process optimisation, inventory management, and production planning

Programme facts

Duration of programme: 2 years

Level of education: AP degree study programme

Internship period: 4th semester

(January – April)

Salary: SU (state educational grant)

Programme language: Danish

Read more about this programme at
cphbusiness.dk/logistikøkonom

Marketing Management

The Marketing Management programme qualifies students to handle tasks in areas including marketing, sales, social media, entrepreneurship, financial management, and business development.

Marketing Management students gain broad knowledge of marketing, as well as economic, legal, organisational, and cultural conditions. We emphasise teaching students to translate theory into practice, preparing them to strengthen and develop a company's marketing and overall business domestically and internationally.

Our instruction includes real-life case studies, and we work closely with businesses during the programme.

During this programme, students learn about and practise:

- International marketing
- Economics
- Sales and marketing communications
- Developing new products, services, and concepts
- Business law

What is this degree for?

This degree qualifies students to handle various job functions in areas including media and marketing, commerce, and shipping. Holders of a Marketing Management degree typically work as marketing assistants, marketing co-ordinators, digital marketing specialists, e-commerce co-ordinators, event co-ordinators, and sales assistants.

Programme facts

Duration of programme:	2 years
Level of education:	AP degree study programme
Internship period:	4th semester (January – April / August – November)
Salary:	SU (state educational grant)
Programme language:	Danish

Read more about this programme at cphbusiness.dk/markedsføringsøkonom

Environmental Technology

The Environmental Technology programme qualifies students to work in environmental studies, climate solutions, and sustainable resource usage.

The programme incorporates classroom instruction, practical field work, presentations, field trips to businesses, and projects.

During this programme, students learn about and practise:

- Sustainable development
- Sample collection and purification methods
- Climate challenges
- Waste and chemical handling
- Environmental legislation

What is this degree for?

The work of an Environmental Technology degree holder might include:

- Environmental studies; e.g., soil, air, and water
- Environmental improvements in businesses
- Establishing a business's environmental impact
- Chemical handling and hazardous chemicals
- Environmental oversight of businesses
- Minimising waste and increasing recycling
- Environmental legislation
- Wastewater and solid waste consulting

Programme facts

Duration of programme: 2 years
Level of education: AP degree study programme
Internship period: 4th semester
(January - April)
Salary: SU (state educational grant)
Programme language: Danish

Multimedia Design

The Multimedia Design programme qualifies students to plan, design, and execute digital media productions using the latest multimedia tools. Students learn web development, graphics, video, and online business communication skills.

During this programme, students learn about and practise:

- Digital media production
- Video and graphical communication
- Web design and front end development
- Designing and programming digital user interfaces
- Information architecture
- Interaction development and programming

What is this degree for?

This degree prepares students to work with a variety of media in communications. We highly emphasise digital media production, and we work extensively with communication channels like video and graphics, as well as with web design and web development technologies, programming, and content management systems. Consequently, students will be able to work in web development, graphics, video, and online communication.

Programme facts

Duration of programme:	2 years
Level of education:	AP degree study programme
Internship period:	4th semester (January - April)
Salary:	SU (state educational grant)
Programme language:	Danish

Service, Hospitality, and Tourism Management

The Service, Hospitality, and Tourism Management programme prepares students to develop, plan, and execute services domestically and internationally at businesses focused on people and experiences in the event, tourism, hotel, and retail industries.

During this programme, students learn about and practise:

- Service and experience design
- Business sense
- Collaboration and relationships
- Finances and operations
- Innovation and experience-based business development

What is this degree for?

This degree qualifies students for a variety of service industry jobs in Denmark and abroad, such as at travel agencies, airlines, event organisers, sport businesses,

tourism organisations, retailers, hotels, and restaurants. Students may also work in management, service development, and customer care in other industries.

Programme facts

Duration of programme:	2 years
Level of education:	AP degree study programme
Internship period:	3rd semester (January - April / July - October)
Salary:	SU (state educational grant)
Programme language:	Danish

**Top-up bachelor's degree programmes
at Cphbusiness**

Data Analysis

The Data Analysis top-up bachelor's degree programme is designed for students who are interested in data-driven business development. The amount of data available is increasing in all kinds of organisations. Whether it be commercial data, production data, financial data, or HR data, optimally collecting, analysing, and using data is a major challenge with major potential.

The Data Analysis programme qualifies students to independently contribute to or execute these tasks using skills in such areas as machine learning, statistics, knowledge of data sources, data visualisation, organisational data maturity analysis, and more.

During this programme, students learn about and practise:

- Programming in R, statistics, and machine learning
- Algorithms and behaviour
- Big data, databases, and cloud technologies
- Organisational data maturity and data visualisation
- Data visualisation, scientific theory, data methods, data law, and ethics

What is this degree for?

Students learn new technologies and advanced analysis skills that enable them to take on tasks at the intersection of business and IT. Students learn to assess a business's data maturity, and to implement, design, manage and execute data-related projects. Data analysts have an attractive profile that meets businesses' demands for employees with analysis, programming and IT skills.

Programme facts

Duration of programme:	1½ years
Level of education:	Top-up bachelor's degree
Internship period:	3rd semester (August – November)
Salary:	SU (state educational grant)
Programme language:	Danish

E-commerce Management

This programme aims to qualify students to independently handle strategic operations and business development related to an organisation's e-commerce solutions from a global perspective.

The programme qualifies students for work in digital strategy, conversion strategy, and optimisation strategy, focusing on the customer experience and customer loyalty. The E-commerce Management top-up bachelor's degree builds on a commercially orientated AP degree, such as the Marketing Management degree.

During this programme, students learn about and practise:

- Digital business sense
- Customer experience
- Advanced digital marketing
- Creative content

What is this degree for?

This programme qualifies students to handle various job functions in fields including customer experience, advanced digital marketing, creative content, digital business sense, and e-commerce technology.

Holders of a top-up bachelor's degree in E-commerce Management typically work as e-commerce co-ordinators, digital marketing co-ordinators, and e-commerce assistants.

Programme facts

Duration of programme: 1½ years
Level of education: Top-up bachelor's degree
Internship period: 3rd semester
(August – November)
Salary: SU (state educational grant)
Programme language: Danish

Read more about this programme at cphbusiness.dk/e-handel

Financial Management and Service

The Financial Management and Service programme is a 3½-year top-up bachelor's degree programme that gives students a solid foundation to independently handle complex advisory, sales and consulting tasks in banking, mortgage lending, insurance, pensions, real estate, auditing, and property management.

During the programme, students choose one of five specialisations: financial business (banking and mortgage lending institutions), insurance (non-life or life and pension), real estate, property management, or auditing. The specialisation options give the programme an extra vocational and practice-related dimension.

What is this degree for?

The programme provides students with a solid foundation for work at businesses in the financial sector: banks, real estate brokerages, property management companies, and insurance companies.

During this programme, students learn about and practise:

- Economics and financing
- Social economics, statistics, and methods
- Business and financial law, consulting, and ethics
- Marketing, sales, and customer psychology
- Organisation, communication, and presentation skills
- Industry-specific subjects: Banking and mortgage lending, real estate, property management, and insurance

Programme facts

Duration of programme:	3½ years
Level of education:	Top-up bachelor's degree
Internship period:	5th semester (August - January)
Salary:	SU (state educational grant)
Programme language:	Danish

cphbusiness.dk/finansbachelor

Innovation and Entrepreneurship

The Innovation and Entrepreneurship programme aims to qualify graduates to launch, run, and grow new businesses or new units within existing businesses. The programme focuses on interdisciplinary teams and networking. In light of this, students with a wide variety of educational backgrounds work together during this programme.

The main focuses are innovation and development, leadership and networking, practical business management, growth, and entrepreneurship. The programme highly emphasises a combination of theory and practical experience. Because of this, many students launch and develop their own businesses while in the programme.

What is this degree for?

Upon completion, students will have the skills to lead teams and launch, run, and grow new businesses or new units within established businesses. Students become attractive players in the job market, able to not only run their own businesses but also take on roles like innovation co-ordinator and project manager at other businesses.

During this programme, students learn about and practise:

- Innovation, including testing and selecting relevant products and solutions
- Entrepreneurship and intrapreneurship
- Business development and growing a business
- Management, including team management and project management

Programme facts

Duration of programme:	1½ years
Level of education:	Top-up bachelor's degree
Internship period:	3rd semester (January – April / August – November)
Salary:	SU (state educational grant)
Programme language:	Danish

Read more about this programme at cphbusiness.dk/innovation-og-entrepreneurship

International Sales and Marketing

The International Sales and Marketing programme seeks to prepare students to independently and professionally handle job functions related to the marketing efforts of international businesses, including small and medium-sized businesses, with an emphasis on international business-to-business sales.

The International Sales and Marketing top-up bachelor's degree builds on a commercially orientated AP degree, such as the Marketing Management degree.

What is this degree for?

This degree qualifies students to handle various job functions in areas including marketing, media, and commerce. Holders of an International Sales and Marketing top-up bachelor's degree typically work as account managers, sales consultants, sales managers, project managers, marketing consultants, and marketing managers.

During this programme, students learn about and practise:

- International sales and marketing
- Economics
- Management, organisation, and logistics
- International business law
- Scientific theory and methodology

Programme facts

Duration of programme:	1½ years
Level of education:	Top-up bachelor's degree
Internship period:	3rd semester (January - April / August - November)
Salary:	SU (state educational grant)
Programme language:	Danish

Read more about this programme at
cphbusiness.dk/international-handel-og-markedsføring

International Hospitality Management

The International Hospitality Management programme offers students instruction in tourism, hotel management, and experience economics from an international perspective. This programme is designed to meet the major need for employees at businesses in the hospitality industry.

Students will be able to handle a wide variety of jobs revolving around handling practical and complex tasks related to business management, operations, and development with a focus on the hotel, tourism, restaurant, and experience industries. The programme includes instruction in such subjects as strategy, economics, management, cultural awareness, and guest conceptualisation.

What is this degree for?

The programme is designed to meet the major need for hospitality management professionals, with a view towards employment in the hotel, tourism, or restaurant industry in such positions as guest relations manager, front desk manager, service manager, restaurant manager, or event manager. The programme has a clear, international perspective, and students will be prepared to handle practical and complex tasks in business management, operations, and development.

During this programme, students learn about and practise:

- Employee and organisational development
- Business operations
- Hospitality and guest relations
- Strategic value creation

Programme facts

Duration of programme: 1½ years
Level of education: Top-up bachelor's degree
Internship period: 3rd semester
(July – October)
Salary: SU (state educational grant)
Programme language: Danish

Read more about this programme at
cphbusiness.dk/international-hospitality-management

Software Development

The Software Development top-up bachelor's degree programme is designed for students who are interested in working with large IT systems. It seeks to prepare graduates to participate in globally distributed development projects, with a view towards eventual system architect work.

The programme has a special emphasis on system integration and architecture. Both in terms of technical solutions and organisational collaboration in the internal development processes of large projects. Instruction is based on widely used methods and technologies, and the programme aims to be at the forefront of technological and methodological developments.

What is this degree for?

Holders of a Software Development degree typically find jobs as system developers in large and global IT projects. You could work as a system developer, programmer, application architect, system architect, IT architect, project manager, or tester.

During this programme, students learn about and practise:

- Large system development
- System integration
- Database development
- Testing

Programme facts

Duration of programme: 1½ years

Level of education: Top-up bachelor's degree

Internship period: 3rd semester
(January - April /
August - November)

Salary: SU (state educational grant)

Programme language: Danish

cphbusiness.dk/softwareudvikling

Sport Management

The Sport Management programme seeks to prepare students to independently handle strategic, financial, and marketing-related tasks in the sport and leisure industries, in both the public and private sectors. Students learn about membership management, event planning and execution, business plans, and concept development, as well as handling co-ordination and project management functions.

Sport Management graduates typically work in such positions as co-ordinator, business manager, project manager, event manager, or a marketing-related position. The top-up bachelor's degree in Sport Management can build directly on an AP degree, such as the Service, Hospitality, and Tourism Management and Marketing Management degrees.

What is this degree for?

The degree qualifies students to handle a variety of jobs at businesses in the sport, event, and leisure industries. Students will be able to find work as event planners, marketing and event co-ordinators, sponsorship co-ordinators, development consultants, sport consultants, project managers, and key account managers.

During this programme, students learn about and practise:

- Sport marketing
- Business management and organisation
- Events and promotions
- Sports law and economics

Programme facts

Duration of programme: 1½ years

Level of education: Top-up bachelor's degree

Internship period: 3rd semester
(August – November)

Salary: SU (state educational grant)

Programme language: Danish

Read more about this programme at
cphbusiness.dk/sportsmanagement

Web Development

The Web Development programme is designed for students who are interested in focusing on web technologies with a variety of spheres of application. A wide variety of jobs are open to web developers. They range from more advanced web development projects to the use of multimedia in integrated communication solutions.

The programme qualifies students for development-orientated work in a society known for rapid development of digitalisation needs and the application of increasingly advanced methods in the industry/media. The programme has a technical focus, but it also accounts for the many disciplines that interact with the technology, such as design and communication.

What is this degree for?

It prepares students to work with technologies and development methods that are used in many different types of jobs. Students may find work as web developers, frontend developers, UX specialists, CMS developers, or app developers.

Students will be capable of working on more advanced web development projects that target numerous platforms, developed in modern languages like JavaScript, C# and Python.

During this programme, students learn about and practise:

- Front- and back end programming
- Development environments
- Databases
- Interface design

Programme facts

Duration of programme:	1½ years
Level of education:	Top-up bachelor's degree
Internship period:	3rd semester (August – November)
Salary:	SU (state educational grant)
Programme language:	English
